

**TWO HANDS™ ARE
BETTER THAN ONE.**

"Bloody excellent! We have them on all the time during winter and whenever we are shifting baleage during summer. Two Hands on the back and a bale on the front. People have borrowed them and all have been impressed."

Les Frisby, Farmer/Contractor, Titiroa, Southland

DOUBLE PRODUCTIVITY

www.2hands.co.nz

TWO HANDS
DOUBLE BALE GRABS

Contractor ... why not fit Two Hands™ to front and rear linkages and transport four bales.

Add a fourth service and Two Hands™ can be used on your loader to load, unload and stack bales, even placing baleage directly over fences saving gateways from further damage.

**SAVE TIME, SAVE FUEL,
SAVE THE PLANET
WITH YOUR OWN TWO
HANDS™**

Double the efficiency of moving bales with Two Hands™ patented bale grabs.

Designed to fit on three point tractor linkages and loaders, specifically to carry round bales but will also carry square bales on their sides.

While Two Hands are made to be strong they are gentle on baleage wrap.

Already using a loader with grabs to handle baleage? Fit Two Hands™ to your rear linkage and move three bales simultaneously.

"Easy to use, well built, robust and time saving device. Very handy."

John Hughes, JK Baleage, Lorneville, Southland

SPECIFICATIONS
